---

Product builder with experience spanning **traditional finance, blockchain research, and Web3** product development. Combines product strategy and roadmap ownership with hands-on technical delivery across on-chain data infrastructure, developer tooling, AI-agent integrations and stablecoin mechanisms. Founded CanHav Research, building **blockchain products and data services** from concept through implementation, while sourcing clients, building relationships and translating business needs into technical solutions. Previously owned a blockchain and AI intelligence platform used by enterprise customers. Brings a strong foundation in **financial controls, cross-functional collaboration and stakeholder engagement**, with an entrepreneurial approach to identifying opportunities and turning complex technical and market information into usable products.

Key Achievements

- Grew an enterprise blockchain and AI intelligence platform to 10,000+ monthly readers, owning product direction and delivery as the sole Product Manager.
- Reduced client onboarding time by 50% at BMO through research-led process improvements; received the BMO Spotlight Award.
- Won a US$10,000 Hedera hackathon bounty at ETHDenver 2026, competing alongside approximately 750 builders.
- Received a US$6,000 Arbitrum Agentic Track award at Founder House London 2026, in a field of 82 builders.
- Presented the CXDR stablecoin concept at CoinDesk PitchFest during Consensus 2025, following development of a preliminary whitepaper.
- Built an on-chain product stack with a token launchpad, EVM data indexing and backend infrastructure, and an MCP server that lets AI agents query platform data.

Technical Skills

Solidity, TypeScript, Python, SQL, EVM ecosystems, Layer-2 networks, Ponder, Dune, DeFiLlama, Alchemy, REST APIs, MCP, AI-agent infrastructure, NLP and machine-learning pipelines.

Professional Experience

Founder & Product Lead
CanHav Research Nov 2024 - Present
Incubated at Queen's Founders and Innovators Initiative. A Web3 product and research venture building blockchain infrastructure, tokenization tools, stablecoin mechanisms and AI-agent applications.

- Own product strategy and roadmap for a token launchpad on Robinhood Chain and Arbitrum, including factory-contract development and **testnet deployments**; identify and **onboard clients** through conference networking, direct outreach and relationship-building, translating their needs into blockchain solutions.

- Built and operated the data layer, including a hosted Ponder indexer for EVM contract events and a backend that integrates Dune, DeFiLlama, CoinGecko, and Alchemy data into research and risk models; curated nearly **400 structured records**.
- Developed a TypeScript MCP server with per-user **API-key** authentication, enabling AI agents to query platform data; implemented an early working integration of ERC-8004 for AI-agent identity.
- Designed CXDR, a proposed multi-currency **stablecoin mechanism** linked to a basket of currencies, published its preliminary whitepaper and presented the concept at **Consensus 2025**.

Product Manager & Market Research Analyst
Resonance Alliance Inc. Jan 2022 - Dec 2024
Market intelligence platform tracking emerging technology companies, investment and industry trends.

- Joined an early-stage technology business as **the first hire** in a new business unit, progressing from Market Research Analyst to Product Manager.
- Served as the **sole Product Manager** of a Web3 and AI intelligence platform, driving product direction and end-to-end delivery across data ingestion, classification, and research workflows.
- Grew the platform to **10,000+ monthly readers**, supporting enterprise market intelligence and research for users including The Economist, PwC Singapore and Accenture; designed the sector taxonomy that became a core product asset.
- Led an IT infrastructure team of **approximately 10 people** and developed NLP and machine-learning pipelines to turn deal flow into queryable data, coordinating with engineering, leadership and content teams to deliver the product.

Audit Coordinator & Customer Service Representative
BMO Financial Group Jun 2018 - Dec 2021
A major Canadian bank providing personal and commercial banking, wealth management and investment services.

- Joined as a part-time bank teller while studying Accounting and Finance, then moved into audit coordination after graduation.
- Gained experience across **investment and retail banking**, identifying control gaps, strengthening compliance processes and implementing operational improvements.
- Delivered process changes that **reduced client onboarding time by 50%,** earning the BMO Spotlight Award.
- Coordinated across **20 departments** in North America during the transition to remote working, resolving more than **100 inquiries per week** and helping eliminate compliance exceptions.

Education

Master of Financial Innovation and Technology
Smith School of Business, Queen's University Jan 2024 - Jul 2025

Fintech Certification
University of Toronto School of Continuing Studies Sep 2020 - Apr 2021

Bachelor of Commerce, Accounting and Finance
Toronto Metropolitan University Sep 2014 - Jul 2019
