PRODUCT AND ONCHAIN DATA | STABLECOINS, AI AGENTS AND DEVELOPER PLATFORMS

Product builder working across onchain data, developer tooling and stablecoins, from ingestion pipelines to published research. Founded CanHav Research, a token launchpad on Robinhood Chain with its own EVM indexer, data backend and MCP server for AI agents. Previously owned a blockchain and AI data platform used by The Economist, PwC Singapore and Accenture. Brings nearly four years of experience in a traditional financial institution.

Core competencies | Product strategy and roadmapping | Onchain data pipelines and indexing | Developer APIs and MCP | AI-agent infrastructure | Stablecoins and payments | EVM and Layer 2 | Research and documentation | Compliance and controls

PROFESSIONAL EXPERIENCE

Founder and Product Lead, CanHav Research

Nov 2024 to Present

Queen's Founders and Innovators Initiative, Toronto, ON

- Built a token launchpad on Robinhood Chain, an Arbitrum-stack Layer 2, owning the roadmap, clone-based factory contracts and deployments to the Robinhood Chain and Arbitrum Sepolia testnets.
- Built and run the data layer, a hosted Ponder indexer for EVM contract events and a backend that ingests Dune, DefiLlama, CoinGecko and Alchemy data into risk models and research.
- Shipped a TypeScript MCP server with per-user API key authentication so AI agents can query platform data, and one of the first working implementations of ERC-8004 for AI-agent identity.
- Curate a research corpus of nearly 400 structured records and write a weekly industry digest, turning onchain data into documented, decision-ready analysis.
- Designed a multi-currency stablecoin mechanism (CXDR), published the preliminary whitepaper and presented it at CoinDesk PitchFest during Consensus 2025.

Product Manager and Market Research Analyst, Resonance Alliance Inc.

Jan 2022 to Dec 2024

Toronto, ON

- Joined as the first employee in a new business unit and owned the company's blockchain and AI data platform as sole product manager, growing it past 10,000 monthly readers.
- Drove end-to-end design and engineering delivery, from data ingestion through classification, of the platform's enterprise research product.
- Designed the sector taxonomy that became the product's core asset and the reason customers renewed.
- Led an IT infrastructure team of around 10 and built NLP and ML pipelines that turned deal flow into queryable data.

Audit Management, BMO Financial Group

Jun 2018 to Dec 2021

Toronto, ON

- Identified control gaps across investment and retail banking systems and delivered research-backed process changes that cut client onboarding time by 50 percent, earning a BMO Spotlight Award.
- Eliminated compliance exceptions during the bank's work-from-home transition, coordinating across 20 departments in North America and resolving over 100 inquiries per week.

EDUCATION

Master of Financial Innovation and Technology, Smith School of Business, Queen's University

Jan 2024 to Jul 2025

CGPA 4.09/4.30. Director of Research, Queen's University Alternative Assets Fund. Coursework in financial engineering, digital capital markets, automated investing and crypto-economics.

Bachelor of Commerce, Accounting and Finance, Toronto Metropolitan University

Sep 2014 to Jun 2019

Coursework in financial modelling and investment analysis. Chair, Ryerson Investment and Securities Knowledge Program.

Fintech Certification, University of Toronto School of Continuing Studies

Sep 2020 to Apr 2021

Financial programming, crypto markets and distributed ledger technology using Python, SQL and Solidity.

SKILLS

Onchain and Data | EVM and Layer 2 (Arbitrum, Robinhood Chain), Solidity, Ponder indexing, Dune, DefiLlama, Alchemy, SQL, Python, TypeScript, NLP and machine learning pipelines

Product and Platform | Roadmapping, technical specification, REST APIs, MCP, stablecoin design, go-to-market, documentation

RECOGNITION AND PUBLISHED WORK

Awards | Winner, Hedera Hackathon at ETHDenver 2026 (USD 10,000 bounty among about 750 builders). Agentic Track Award, Arbitrum Founder House London 2026 (USD 6,000 prize among 82 builders). BMO Spotlight Award.

Published | CXDR Preliminary Whitepaper. Stablecoin Market Map. Web3 Core Technologies Report. Metaverse 2022 Report. Weekly digest at research.canhav.com. Portfolio at wazarat.io.
